- Access the application on mobile devices

User Stories:

As a Student, I should be able to see the Welcome page.

As a Student, I should be able to see Menu Bar and School Logo.

As a Student, I should be able to see my information after clicking Student Profile button.

As a Student, I should be able to see TimeTable button on the menu.

As a Student, I should be able to see my Time Table after clicking the TimeTable button.

As a Student, I should be able to open and view the application on mobile devices.

Instructions:

1. Please reuse the application created in spring 1
2. Please use HTML 5 and CSS 3 concepts
3. Try to make a proper application
4. Deploy the application on http server
5. Please make sure the application should Responsive
6. Please use flex box to arrange the content.
7. Use Bootstrap to beautify the layout for eg: TimeTable , button etc.

Application Overview:

The Student Management System is developed using HTML5, CSS3, and Bootstrap.

The application includes:

- A Welcome Page with School Logo
- Navigation Menu with Student Profile and TimeTable options
- Student Profile section with student details
- Time Table page showing weekly schedule
- Responsive layout for mobile and desktop
- Bootstrap is used to improve UI design and responsiveness.
  Flexbox is used to align student profile content properly.
